DETAILED OFFICE ACTION

1. In response to Applicant communication on 7/24/2007, the Office Action issued on 5/8/2007 is withdrawn.
2. Claims 1-25,30-34,37- 40 including new claims 37-40 are pending in the Application with claims 2-7,9-11,13-25,30-34 with drawn from consideration. Applicant has cancelled claims 26-29 and 35-36.

Drawings

3. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the drawing of a-- **“perpendicular magnetic anisotropy component”**--in claim 1 and claim 40 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as “amended.” If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for

consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the examiner does not accept the changes, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 1, 40 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1,40 are indefinite because of recitation:

-- "**Perpendicular magnetic anisotropy component**" -- and Applicant fails to show this component in the drawing or the specification; therefore, it is not possible to know the metes and bound that the applicant seeks patent protection.

6. Claims 8,12,37-39 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite because claims 8,12,37-39 are dependent claims that depend on claim 1.

7. For now, there are no prior arts rejections of claims 1,8,12,37-39,40 because it is the Examiner position that only when the issues of indefiniteness under 35 U.S.C. 112, second paragraph of those claims are resolved, then a meaningful determination of patentability of the invention, (by comparing the invention with prior arts) can be made.

8. When responding to the office action, Applicants are advised to provide the examiner with the line numbers and the page numbers in the application and/or references cited to assist the examiner to locate the appropriate paragraphs.

9. A shortened statutory period for response to this action is set to expire 3 (three) months and 0 (zero) day from the day of this letter. Failure to respond within the period for response will cause the application to be abandoned (see M.P.E.P. 710.02(b)).
